| Prerequis              | Prerequisites: |              |                              |                     |        |
| Weekly Hours:          |                |              |                              |                     |        |
| Lecture: 2 Exercise: 0 |                | Practical: 0 | <b>Total:</b> 2 credit hours |                     |        |

#### **Professional Information**

### **Course Aims:**

This course is designed to provide students with a comprehensive understanding of creative thinking, communication, and the integration of modern technologies. Through a combination of theoretical concepts and practical applications, students will develop the skills and knowledge needed to effectively communicate in diverse contexts, manage business functions, and leverage modern technologies for communication purposes. Additionally, students will explore contemporary topics such as conflict management and diversity in communication.

## After completing this course students must be able to:

- 1. To identify critical thinking and idea generation skills through the investigation of theories and case studies
  - 2. To generate or select innovation and change ideas
  - 3. To apply practical, critical and creative thinking skills within a variety of academic assignments
  - 4. To recognize the characteristics of critical and creative thinking and their application in the personal, academic and workplace setting
  - 5. To communicate in writing and/or through oral presentation innovative and creative ideas

|--|---------------|--------------------|--------------------------|--|
| Knowledge and understanding  Intellectual Skills  Professional and practical skills  General and Transferable skills |               |                    |                          |  |
| A1, A8, A10  | B1, B10, B 15 | C7, C 8, C 12, C17 | D1, D2, D3, D7, D10, D12 |  |

# **Intended learning outcomes of course (ILOs)**

## a. Knowledge and Under-Standing:

- **a1.** Define creative thinking and its importance in various aspects of communication.
- **a2.** Explore different creativity models and their applicability in problem-solving and innovation.
- **a3.** Define communication and its role in interpersonal, intercultural, and organizational contexts.
- **a4.** Understand the role of communication in conducting interviews, meetings, negotiation, and intercultural interactions.
- **a5.** Explain the key concepts of communication, including encoding, decoding, feedback, and noise.

## b. Intellectual Skills:

- **b1**. Compare and contrast vertical and parallel thinking approaches.
- **b2.** Analyze when each thinking mode is most appropriate in different situations.
- **b3**. Distinguish between written and oral communication, and understand the significance of non-verbal communication and body language.
- **b4**. Analyse conflict management strategies in communication contexts.
  - **b5.** Evaluate the effectiveness of creative thinking tools in problem-solving scenarios.

## c. Professional and practical skills

- **c1.** Develop innovative approaches to engage and communicate with employees.
- **c2.** Use creativity models to generate innovative solutions in business contexts.
- **c3.** Develop strategies for improving metacognition to enhance decision-making and problem-solving skills.

#### d. General and transferable skills

- **d1.** Engaging in class discussions will foster the development of communication, teamwork, and cultural competence skills, as students exchange diverse perspectives and ideas.
- **d2.** Deliver presentations to demonstrate their ability to communicate ideas persuasively and adapt their communication style to various audiences.

- **d3.** Collaborative group activities will encourage students to work together effectively, enhancing their teamwork, leadership, and conflict resolution capabilities.
- **d4.** Working on case studies will allow students to showcase their critical thinking abilities by evaluating complex situations and proposing solutions.
